

## 000-7 OUTFIT MODELS 1928 – 1935 (LIVERPOOL)

These tables show all the Meccano models in the main Liverpool manuals between 1928 and 1935 and how the model numbers changed during the period and also if the model was redesigned. They also show if the model (or a similar one) came from the previous 1927 manual and also whether they were kept in the future 'Lettered Outfits' manuals. See a separate document for details of the American manuals and how they compare with the Liverpool manuals.

Notes:-

- 1) (D) against a 'Prior' or 'After' model number shows that there was a relatively minor change. Often this was to use the different parts that were included in the outfits to improve the model.
- 2) (M) against a 'Prior' or 'After' model number shows that there was a major or complete redesign of the model. Often the only similarity was the name of the model.
- 3) In the 'Prior' column '27/00-nn' refers to models in the 1927 '00' manual.
- 4) In the 'Prior' column '27/nn' refers to models in the main 1927 manuals (Similar for 1925 & 1926 manuals).
- 5) In the 'Prior' column 'NMnn-nn' refers to models in the 1928-31 New Models books.
- 6) The number in the 'After' column refers to the model number in the 1934 'Lettered Outfits' manuals (Except for Outfit 000 which continued up until 1941).
- 7) The 1/30 edition of the manuals was the same as the 1929 manuals.
