

# Some of the great working models that can be made in standard Plastic Meccano

## SET 100

Simple, easy-to-make models of things familiar to every young child. Like a wheelbarrow, windmill, hoist, fork lift truck, rattle, chair.

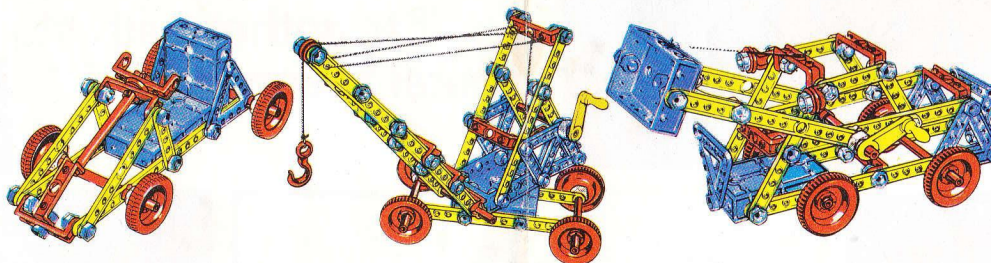

Instructions for making 24 working models.

## SET 200

Extra parts keep abreast with his growing skill and imagination by enabling more and bigger models to be made. Like a bulldozer, mobile crane, car, helicopter, lunar module.

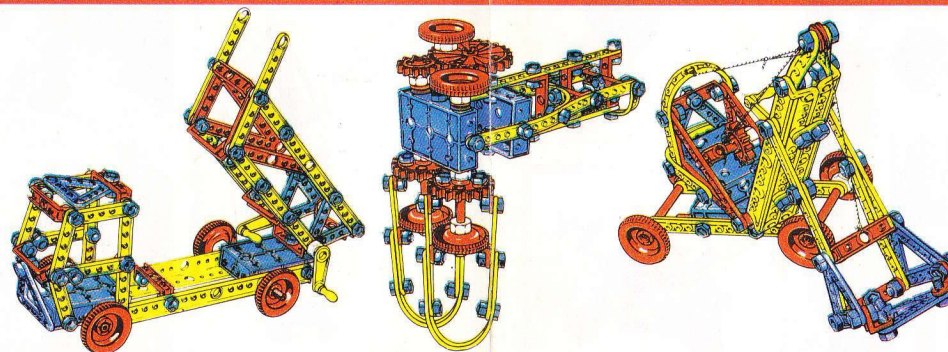

Instructions for making 42 working models.

## SET 300

The Set that introduces gear wheels and new angle girders etc. Builds models like a tipper truck, food mixer, excavator, hovercraft, jumbo crane.

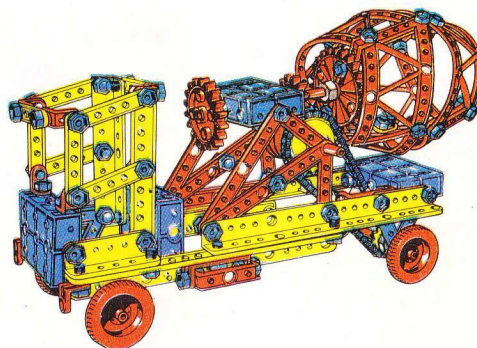

Instructions for making 58 working models.

## SET 400

The Set with the greatest scope—it contains all the very latest Plastic Meccano parts. Builds super 'King-Size' moving models like a flying jet, weighing machine, bulldozer, cement mixer, Meccanograph.

Instructions for making 70 working models.

## LATEST PARTS

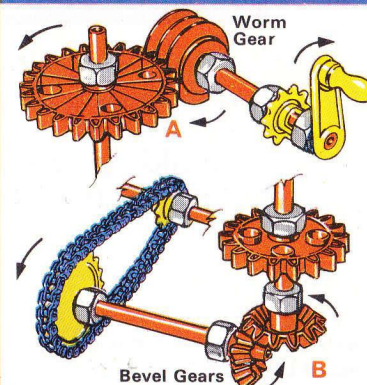

open up great new possibilities for model-making

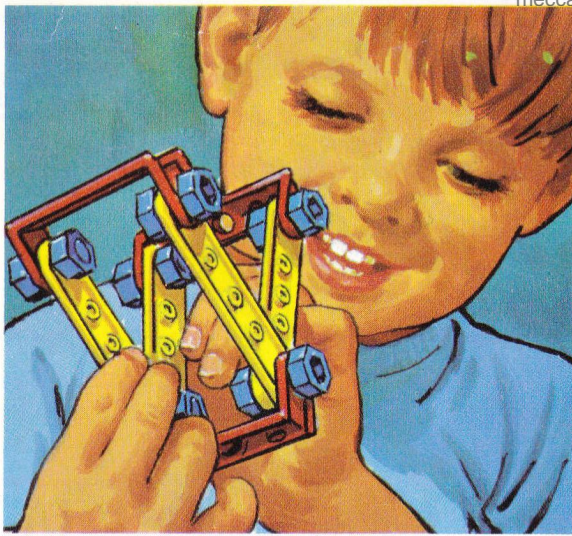

- 1. Angle Girders** Extra-rigid, they enable stronger units to be built with fewer parts.
- 2. Worm Gear** A worm gear for a large reduction ratio drive. Very little friction means easy running.
- 3. Bevel Gear** For 'right-angled' drive in a small space.
- 4. Eye Bolt** { For useful linkages
- 5. Fishplate** { and extra rigidity
- 6. Hexagon Key and Ring Spanner** For easier assembly of nuts and bolts. The illustrations below show how the bevel and worm gears work in an actual Meccano model—the Meccanograph.

Pen and stiff cardboard drawing platform not included in Set.

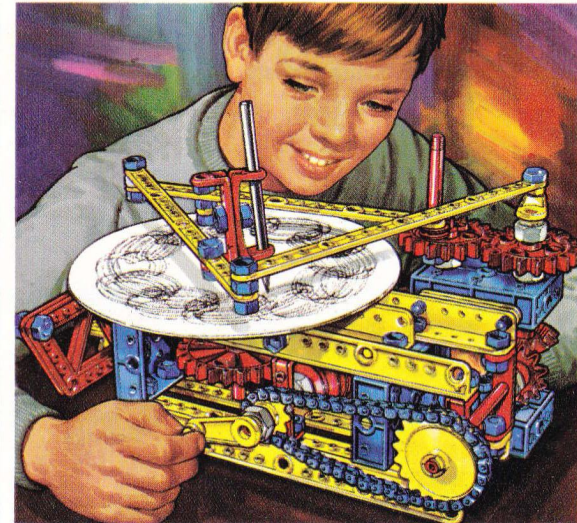

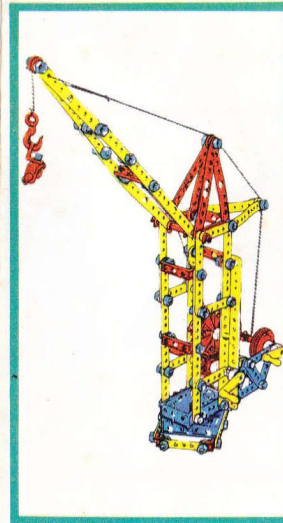

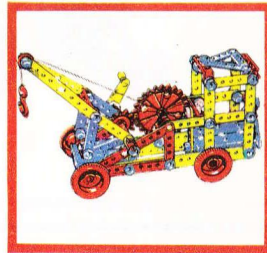

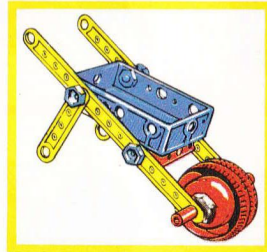

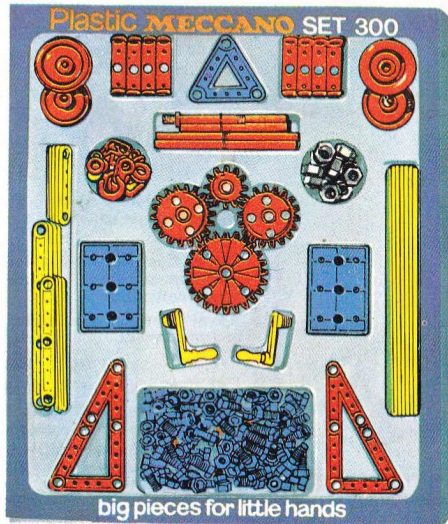

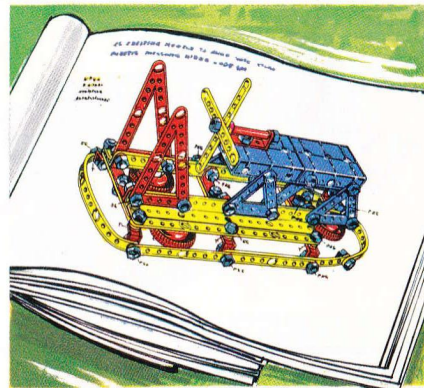

Plastic Meccano is big – to make building easy for little hands. Big nuts and bolts, with big easy-to-screw-on threads, big pieces with bold bright colours that make models exciting to look at, exciting to build and Plastic Meccano is made to fit together with standard metal Meccano.

**Plastic  
MECCANO**

Easy-to-follow  
working drawings  
in colour for  
building lots of  
exciting models.

Only Plastic Meccano Sets have gears, sprockets and chains with easy, slip-proof collet fixing for making life-like working models.
