

TODAY'S MECCANO®

Everyone knows about Meccano—the durable metal construction system that can be extended and built onto, assembled and re-assembled time and time again. It has been a favourite for over 70 years, proving itself from generation to generation. Today's Meccano is all that and more!

"Today's Meccano" means action, with new motorised working models that introduce the realism and movement demanded by today's children.

Choose from the Standard Range of five sets, or for the child with a particular interest, there are the Theme Sets. And of course for the young engineering genius, there is always the coveted No. 10 Set—costing around £350.

STANDARD SETS

Standard Sets, Nos. 1 to 5 all come complete with a detailed manual of illustrated instructions for the construction of a wide variety of models. However, children soon learn to construct and adapt models for themselves. There's no real limit to the number of models which can be built, even from the simplest set.

Set Nos. 2 to 5 include a 1½-4½ volt battery powered motor and forward/reverse control box.

EXTENSION AND POWER PACKS

These packs are the perfect gift for the child who is already a Meccano enthusiast.

Extension pack 'S' provides sufficient parts to make a No. 3 Set from either a No. 1 or No. 2 Set. (No. 1 Set owners will also need a Power Pack). Extension Pack 'L' will convert either a No. 3 or No. 4 Set to a No. 5 Set.

The Meccano Power Pack contains a Junior Power Drive 1½-4½ volt Reversible Motor with battery/remote control box, plugs and leads.

SEPARATE PARTS

All the parts from the Standard Sets, together with additional parts for the make-up of more advanced models, are available from Meccano dealers.

NEW FEATURES FOR QUICKER BUILDING, GREATER REALISM!

Wheels: These wide profile, black plastic wheels, give a strong, chunky look to models from Set Nos. 3, 4 and 5. (Army and Highway have heavy tread.)

Cabs: Made in tough pre-formed steel, these are available in both the Highway and Army Sets.

Manuals: Provided with each Meccano Set, giving concise step-by-step photographic building instructions.

Storage Trays: Strong and compact with see-through lid and partitioned body, keeps all your parts safe when not in use and handy when building models.

THEME SETS

The four theme sets have been specially developed for the child who prefers to specialise in a particular subject. They can of course be used in conjunction with Standard Meccano parts.

POWER DRIVE ACCESSORIES

The more advanced modeller will welcome the following as additions to his collection:-

- Magic Clockwork Motor
- Junior Power Drive Reversible Motor (1½-4½ volt D.C. Electric Motor)
- Power Drive Motor with 6-ratio gearbox (3-12 volt D.C. Motor; Gearbox ratios:- 3:1, 6:1, 12:1, 16:1, 32:1, 60:1)
- 6-Ratio Gearbox with Universal Coupling (can be coupled with Meccano electric motors. Gearbox ratios:- 3:1, 6:1, 12:1, 16:1, 32:1, 60:1)
- 4½-12 volt Battery Box
