**LE MANS IN MINIATURE**

By varying the pressure and releasing the plunger of this accelerator you control the speed of your car. (Just like a real racing driver)

This is a real miniature racing circuit, and its flexible parts, straights and curves, can be assembled even more easily and, above all, more quickly than the rails of an electric train. You can build up corners, make hills, hair-pin bends and all the variations of the course. Slow down on the corners, or you may overturn. Once away, accelerate as much as possible, purse from the rear, shoot off like an arrow and... leave the adversary behind.

#### **IDELEC MOTOR**

A revolutionary type of motor drives the cars of Circuit 24. It is extraordinarily powerful and robust. It is based on the principle of alternating current which, at each cycle, attracts the vibrating plate twice, at the same time making the rear axle turn, with a tractive force of more than 4 lbs.

## Here are the six reasons why you will choose **CIRCUIT 24** :

- 1 FIRST OF ALL A ROBUSTNESS THAT WILL WITHSTAND ANY TRIAL** - The cars are so strong that you can drop them without any risk to the mechanism. The DB Panhard and the Ferrari, are guaranteed **unbreakable**, bodywork included. This is essential anyway with racers that, at any moment, run the risk of leaving the track and falling on the ground.  
So ask your toy-shop to give you a demonstration, you can throw a DB Panhard to the ground, and afterwards it will run as well as ever. Only CIRCUIT 24 cars can stand up to such a trial.
- 2 A CERTIFICATE OF GUARANTEE** - Fully guaranteed by Meccano Ltd..
- 3 IT IS THE QUICKEST CIRCUIT TO SET UP** - The system of road coupling, which includes no clips or anything awkward, enables even a complicated circuit to be set up in a few moments. **The two ends on a non-symmetrical circuit always fit exactly**, because the angles of the curves have been calculated in accordance with the Golden Numbers. Therefore : no time wasted.
- 4 IT IS AS THOUGH YOU OWNED A REAL CAR. They run for as long as real ones** - Of course, the tyres have to be changed from time to time, as also the pick-ups and rear axle, but the car itself is practically unwearable.  
The FERRARIS have special bodywork (that is more costly) forming a resonance chamber, thus reproducing perfectly the noise and atmosphere of motor racing.
- 5 YOU CAN CONSTRUCT WITH ABSOLUTE FIDELITY THE "LE MANS 24 HOUR" RACE** - Thanks to the kind permission of the "Automobile Club de l'Ouest" (which only CIRCUIT 24 has), you can reproduce this great motor racing event, exactly.
- 6 UNBEATABLE PRICES** - Because of enormous production (the conveyor belts produce more than 2000 CIRCUIT 24 cars per day!), you will have all the advantages of faultless quality at a very modest price.

DEALER'S STAMP

## A NEW GAME OF SKILL...

*200 miles per Hour in your sitting room*

**Lightning pick-up... Exhilaration of speed... Cornering and side-slipping technique... You will live through all the thrills of real motor racing in your own home on your "Circuit 24", racing at over 3m/sec. (i.e., 200 miles per hour, at full scale). It requires concentration and skill, since the way of driving and all the reflex actions are the same as in reality... Try it yourself, you will be enthralled.**
