MECCANO

Meccano model-building is marvellous fun. You never get tired of it; the more you build the greater the fascination becomes.

A Meccano Outfit gives you lots of excitement from the very minute you get it home. There are no complicated instructions to worry about. You look through the Manual that is packed with your Outfit, choose a model you like, and set to work to build it. The illustration shows you just what to do, and you feel the thrill as soon as you begin to build.

The fun of building with Meccano increases all the time until you have completed a model; and then comes the greatest thrill of all—setting the model to work by means of a Meccano Clockwork or Electric Motor. There is nothing in the world so fascinating as a motor-driven Meccano model working away at full

13/639/1,1500. U.K.

speed. You have built it with your own hands, and now you are the engineer-in-charge in full control!

Soon you will want to build another model that has caught your eye. In a few minutes you take your first model to pieces, and there are all your parts ready for you to build the new model. And what a variety of models are shown in the Meccano Manuals, even the smallest of them! Best of all, nearly all Meccano models actually work.

So you go on building model after movel, not only those illustrated in your Manual, but others of your own design. Then you become a real inventor!

There is always something new to be done with Meccano. Dull evenings are a thing of the past!

MECCANO No. O OUTFIT Builds 27 Models

More New Models!

This Outfit contains a good selection of Meccano parts, and is specially suitable for the younger boys for whom it will provide hours of fun. The Instruction Manual and "More New Models" Manual packed in the Outfit give 27 examples of models that can be built, consisting of Trucks, Cranes, a Mechanical Hammer, Elevator, Horizontal Steam Engine and a variety of others. Four of these fine models are illustrated below

Price 3/-

Swingboat

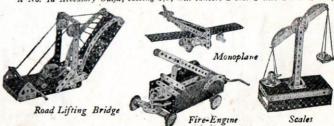

Dockside Crane

MECCANO No. 1 OUTFIT Builds 77 Models

This is a splendid Outfit with which to commence the Meccano hobby. A Manual of instructions and a "More New Models" Manual are included showing how 77 interesting models such as the four examples shown below can be constructed. This fine range includes Ships, Cranes, a Mechanical Shovel, Windmill, Aeroplanes, a Motor Lorry, Lifting Bridge, etc., each capable of providing the most fascinating entertainment for boys Price 4/6

A No. 1a Accessory Outfit, costing 1/9, will convert a No. 1 into a No. 2 Outfit.

MECCANO No. 2 OUTFIT Builds 104 Models

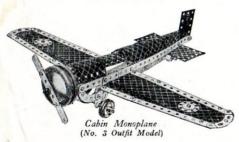

More New Models!

No. 2 Outfit contains an excellent assortment of parts, together with a Manual of Instructions and a " More New Models " Manual giving examples of 104 models that can be built. The models include a Railway Breakdown Crane, Steam Wagon, Beam Engine, Floating Crane and a variety of others.

Price 6/-

A No. 2a Accessory Outfit, costing 3/3, will convert a No. 2 into a No. 3 Outfit.

Travelling Crane (No. 2 Outfit Model)

MECCANO No. 3 OUTFIT Builds 131 Models

This fine Outfit is a great favourite with boys. It contains an excellent variety of Meccano parts with which a fine range of models can be built, including a Block-setting Crane, Battle Cruiser, Fire-Engine, Marine Engine, etc. A big, fully illustrated Manual of Instructions and a "More New Models" Manual are included, giving examples of 131 models that can be built with the Outfit.

Price 9/-

A No. 3a Accessory Outfit, costing 4/3, will convert a No. 3 into a No. 4 Outf.

(No. 3 Outfit Model)

MECCANO No. 4 OUTFIT Builds 158 Models

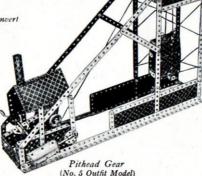

More New Models!

The owner of a No. 4 Outfit is able to build models of a more complicated and interesting type, including a Gantry Crane, Submarine, Horizontal Steam Engine, Sports Car, Six-wheeled Steam Wagon, Tank Locomotive, 'etc., all designed on correct engineering principles. The Manual of Instructions and "More New Models" Manual that are included give examples of 158 models that can be built with the Outfit.

Price 12/6

A No. 4a Accessory Outfit, costing 5/6, will convert a No. 4 into a No. 5 Outfit.

MECCANO No. 5 OUTFIT Builds 185 Models

This superb Outfit contains a bigger and more varied range of parts by means of which a splendid selection of realistic models can be built. These include a Military Tank, Electric Locomotive, Autogiro, Motor Lorry, Razing Seaplane, Tank Lorry, Railway Breakdown Crane, etc. The Instructions Manual and "More New Models" Manual included show how to build 185 models.

Price 17/6

A No. 5a Accessory Outfit, costing 5|-, will convert a No. 5 into

MECCANO No. 9 OUTFIT Builds 293 Models

Realistic working models of some of the world's most famous engineering masterpieces can be built with this Outfit. The Manuals of Instructions and the "More New Models" Manual included give examples of 293 splendid models

No. 9 Outfit is supplied either in a stout carton or in a handsome enamelled cabinet. The number of Meccano parts contained in either type of Outfit is the same.

A No. 9a Accessory Outfit, costing 120/-, will convert a No. 9 into a No. 10 Outfit.

MECCANO No. 10 OUTFIT Builds 314 Models

This is a complete and comprehensive Outfit, containing all the Meccano parts necessary to build each of the models featured in the Meccano Manuals of Instructions and the "More New Models" Manual, a total of 314 models. It is an ideal present for any boy who is interested in mechanics, or who is keen on building and inventing.

The Outfit is packed in a beautifully enamelled cabinet fitted with lock and key.

NEW MECCANO MECHANISED ARMY OUTFIT

This fine new Outfit consists of a big assortment of specially designed Parts with which realistic models of Tanks, Anti-Aircraft Guns, Field Guns, Searchlight Lorries, Transport Lorries, etc., can be built. All the parts are finished in the correct shade of Service green. The Anti-Aircraft Gun shown here is one of the splendid models described in the illustrated Manual of Instructions packed with each Outfit.

Model of a Mobile Anti-Aircraft Gun built with the new Meccano Mechanised Army Outfil.

MECCANO ACCESSORY OUTFITS

Meccano is sold in eleven different Outfits, ranging from No. O to No. 10. Each Outfit from No. 1 upwards can be converted into the next one larger by the purchase of an Accessory Outfit. Thus, Meccano No. 1 Outfit can be converted into No. 2 Outfit by adding to it a No. 1a Accessory Outfit. No. 2a Outfit would then convert it into a No. 3 and so on. In this way, no matter with which Outfit you commence, you can build it up by degrees until you possess a No. 10 Outfit. The prices of Accessory Outfits are as follows:

No	1a	Accessory	Outfit	converts a	No.	1 Ou	tfit	into a	No. 2		Price	1/9	No. 6a Accessory O	utfit c	onverts	a No. 6	Outfit	into	a No. 7		Price	10/-

MECCANO ELECTRIC MOTORS-20-VOLT and 6-VOLT

The Meccano Electric Motors listed below have been designed specially to provide smooth-running power units for the operation of Meccano models. The special advantage of Meccano Electric Motors lies in the fact that they can be run continuously for long periods. If alternating current from the house mains is available, a Meccano 20-volt or 6-volt Electric Motor can be run cheaply and with perfect safety through a suitable Transformer (see page 15). If alternating current is not available, a 6-volt Motor can be run from an accumulator. Both these methods are satisfactory, but the Transformer has the advantage that it can supply current continuously without attention.

No. EO6 ELECTRIC MOTOR (6-volt)

A strongly-built non-reversing Motor of the all-enclosed type. It will drive all the models built from Outfits up to No. 5, and also some of the lighter models built from Outfits 6 to 8. It can be operated through a Meccano T6A, T6 or T6M Transformer from the mains, providing that the supply is alternating current, or from a 6-volt accumulator.

No. EO20 ELECTRIC MOTOR (20-volt)

The E020 is a powerful non-reversing Motor of similar construction to the E06 Motor illustrated above. It is designed to work from alternating current mains supply through a Meccano T20A T20 or T20M Transformer.

Price

No. El ELECTRIC MOTOR (6-volt)

This highly efficient Motor (non-reversing) will give excellent service. It can be operated through a Meccano T6A, T6 or T6M Transformer from the mains, providing that the supply is alternating current, or from a 6-volt accumulator.

Price 7/6

No. E120 ELECTRIC MOTOR (20-volt)

The E120 Electric Motor is a very reliable and smooth-running power unit. It is operated through a Meccano T20A, T20 or T20M Transformer from alternating current supply mains. The Motor is non-reversing.

Price 7/6

In almost every case reduction gearing is necessary with electric motors. All the Meccano Electric Motors except the EO6 and the EO20 have a pinion on the armature shaft, and for these Motors, Gears and Pinions provide the most suitable form of power transmission. The EO6 and the EO20 Motors have a pulley on the armature shaft and suitable reductions in speed can be arranged with Pulleys of various sizes and Driving Bands. In very large models it will be found necessary to employ several stages of reduction, giving a ratio of about 9:1 or 27:1. If an exceptionally powerful drive is required, the ratio must be still further increased.

No. E6 ELECTRIC MOTOR (6-volt)

A fine Motor fitted with reversing motion and provided with starting and stopping controls. It can be operated through a Meccano T6A, T6 or T6M Transformer from the mains providing that the supply is alternating current, or from a 6-volt accumulator.

Price

No. E20b ELECTRIC MOTOR (20-volt)

This 20-voit Electric Motor is an extremely efficient power unit, fitted with reversing motion and provided with stopping and starting controls. It is operated through a Meccano T20A, T20 or T20M Transformer from alternating current supply mains.

Price 13

Full details of all the Meccano Transformers suitable for working these Motors from mains alternating current will be found on page 15. The Transformers comply with the requirements of the British Standards Institution, and are perfectly safe in use.

MECCANO CLOCKWORK MOTORS

These are the finest clockwork motors obtainable for model driving. They have exceptional power and length of run and their gears are cut with such precision as to make them perfectly smooth and steady in operation.

The Magic Motor is the best power unit for driving small models built from Outfits Nos. O to 5. The No. 1, No. 1a and No. 2 Motors are more suitable for driving heavier models built from the larger

Outfits.

The MECCANO MAGIC MOTOR

The Meccano Magic Motor is well designed and strongly constructed and is fitted with a powerful spring giving a long and steady run. It is non-reversing, Each Magic Motor is supplied with a separate ½" Pulley Wheel and three pairs of Driving Bands of different lengths. Price 2/-

No. 1 CLOCKWORK MOTOR

This strongly built and efficient Motor is fitted with a powerful spring that gives a long and steady run, and is exceptionally smooth in action. The Motor is provided with a conveniently placed brake lever by means of which it can be started and stopped. The Motor is of the non-reversing type ... Price 4/6

No. la CLOCKWORK MOTOR

This Motor is more powerful than the No. 1 Motor and is fitted with reversing motion. It has brake and reverse levers ... Price 6/6

is required, the model may be driven direct from the Motor driving shaft, or through a belt and Pulleys providing a 1:1 ratio, which is obtained by using two Pulleys of the same size. When a more powerful drive is required, reduction gearing must be employed in order to produce an increased driving force at the sacrifice of speed.

In building a Clockwork Motor into a model it is important to

consider the type of work that is to be carried out. If only a light drive

No. 2 CLOCKWORK MOTOR

This is a Motor of super quality. Brake and reverse levers allow it to be started, stopped or reversed, as required Price 9/-

THE MECCANO GUILD

Every owner of a Meccano Outfit should join the Meccano Guild. This is a world-wide organisation, started at the request of Meccano boys. Its primary object is to bring boys together and to make them feel that they are all members of a great brotherhood, each trying to help others to get the very best out of life. Its members are in constant touch with Headquarters, giving news of their activities and being guided in their hobbies and interests. Write for full particulars and an application form to Meccano Ltd., Binns Road, Liverpool, 13.

TRANSFORMERS, RESISTANCE CONTROLLERS, CIRCUIT BREAKERS

Meccano Transformers provide a convenient and safe means of driving 6-volt or 20-volt Train Sets and Electric Motors from Alternating Current Mains, All Meccano Transformers, and the Hornby Transformer-Rectifier, are available for the following Alternating Current supplies:—100/110 volts, 50 cycles; 200/225 volts, 50 cycles; 225/250 volts, 50 cycles. They can be specially wound for other supplies. In ordering a Transformer or a Transformer-Rectifier the voltage and frequency of the supply must be stated.

NO. T20A TRANSFORMER

(Output 35 VA at 20/3½ volts) for 20-volt Trains or 20-volt Electric Motors. Fitted with speed regulator and output sockets for lighting fourteen 3½-volt lamps... ... Price 22/6

No. T20 Transformer

(Output 20 VA at 20 volts) for 20-volt Trains or 20-volt Electric Motors. Fitted with speed regulator. Price 17/6

No. T20M Transformer

(Output 20 VA at 20 volts) for 20-volt Trains or 20-volt Electric Motors. This is similar to No. T20, but is not fitted with speed regulator. Price 12/6

No. T22M Transformer

(Cutput 50 VA at 20 volts) for 20-volt Trains. Not fitted with speed regulator. Will operate two trains at the same time, either on the same track or on two separate tracks. In the latter case two Resistance Controllers are necessary to give independent control. Price 13/6

No. T6A TRANSFORMER

(Output 40 VA at $9/3\frac{1}{2}$ volts) for 6-volt Trains or 6-volt Electric Motors. Fitted with speed regulator and separate circuit for supplying current for eighteen $3\frac{1}{2}$ -volt lamps. Price **22/6**

No. T6 TRANSFORMER

(Output 25 VA at 9 volts) for 6-volt Trains or 6-volt Electric Motors. Fitted with speed regulator. Price 17/6

No. T6M Transformer

(Output 25 VA at 9 volts) for 6-volt Trains or 6-volt Electric Motors. This is similar to No. T6 but is not fitted with a speed regulator. Price 12/6

No. T26M Transformer

(Output 50 VA at 9 volts) for 6-volt Trains. Not fitted with speed regulator. Will operate two trains at the same time either on the same track or on two separate tracks. In the latter case two Resistance Controllers are necessary to give independent control ... Price 13/6

The above Transformers cannot be used with the locomotives of the Hornby-Dublo Gauge OO System. The appropriate Transformers for this purpose are listed on page 21.

RESISTANCE CONTROLLER

Where a Hornby 6-volt Train or Meccano 6-volt Electric Motor is operated from a Meccano No. T6M or No. T26M Transformer. or an accumulator, or a Hornby 20-volt Train or Meccano 20-volt Electric Motor from a Meccano No. T20M or No. T22M Transformer. a Meccano Resistance Controller is required to control and regulate the speed of the Motor or Train.

Meccano Resistance Controller, 6-volt or 20-volt ... Price 3/9

When ordering please specify voltage required.

CIRCUIT BREAKER

This automatic Circuit Breaker for Hornby Electric Railways does away with the necessity for the renewal of the fuse wire. If a short circuit occurs. the Circuit Breaker automatically disconnects the power supply from the track. When the cause of the trouble has been removed, the circuit is instantly restored by simply pressing a button.

Hornby Circuit Breaker, for 6-volt or 20-volt trains.

Price 3/6

When ordering please specify voltage required.

No. TR6 Transformer-Rectifier (Output 6 volts at $1\frac{1}{2}$ Amps.) for use with any apparatus requiring a current of $1\frac{1}{2}$ amps. at 6 volts Price 29/6

Gauge OO

DÜBLO

THE PERFECT TABLE RAILWAY

The remarkable success of the Hornby-Dublo Railway introduced last year has proved our claim that this is the finest system in the world for the development of a complete miniature railway where space is limited. The trains are actually one seventy-sixth of the size of real trains, and are marvellous scale models of their prototypes.

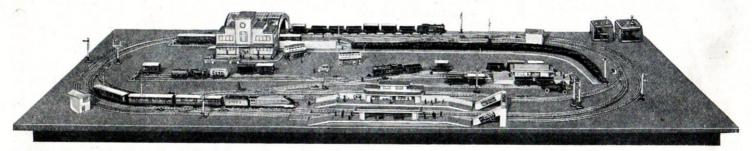

Hornby-Dublo Electric Locomotives are fitted for remote control; starting, stopping, reversing and speed regulation are all carried out from the lineside by the movement of a single lever. All Hornby-Dublo Coaches, Vans and Wagons have automatic couplings.

The great new feature of the Hornby-Dublo System this year is the introduction of Isolating Rails for dividing a layout into separate sections that can be made "alive" or "dead" as desired. By means of these Rails, and special Switches (D2), endless fun can be had by controlling two

or more trains independently at the same time. All kinds of interesting shunting operations can be carried out, every movement being made as on real railways.

Other new features include Electrically-Operated Points and Signals and large radius Curved Rails which, used in conjunction with the standard Dublo Rails, form a perfect double track.

Hornby-Dublo electric trains operate on Direct Current at 12 volts. This current may be obtained in three different ways—first, from Alternating Current mains supply through a Dublo Transformer and a Dublo Controller No. 1; second, from Direct Current mains supply through a D.C. Converter and a Dublo Controller No. 1; third, from Accumulators giving 12 volts, with a Dublo Controller No. 1A.

This attractive layout on a board 8 ft. by 4 ft. shows the splendid possibilities of the Hornby-Dublo System. There is a double track main line serving two stations, and an interesting goods yard in the centre.

Gauge OO

EDP2 HORNBY-DUBLO ELECTRIC PASSENGER TRAIN SET, L.M.S.

This wonderful Train Set represents the highest degree of realism ever attained in Gauge OO, both in general design and extent and perfection of detail. The components comprise the locomotive and coaches of a typical L.M.S. express in its characteristic red livery. The Locomotive, "Duchess of Atholl," is a splendid reproduction of one of the non-streamlined "Duchess" class. These powerful and attractive-looking locomotives are employed mainly in the working of the principal fast and heavy

trains between London and Scotland and London and Liverpool.

The Coaches are modelled on the very latest L.M.S. standard corridor stock used for main line working. One of them is a first-third, and the other a brake-third with guard's and luggage accommodation at the rear end. These Coaches are particularly attractive; they have real cut-out windows glazed with celluloid inside. Another feature that adds to the realism is a corridor partition inside each Coach. Automatic couplings are fitted The Locomotive is not

supplied with Clock-

work mechanism.

The components of the above
Train Set are obtainable separately at the following prices:

EDLT2 Hornby-Dublo Electric Locomotive (Automatic Reversing) and Tender L.M.S. Price 45/EDL2 Hornby-Dublo Electric Locomotive L.M.S. EDP1 HORNBY-DUBLO ELECTRIC & DP1 CLOCKWORK PASSENGER TRAIN SETS, L.N.E.R.

The Hornby-Dublo L.N.E.R. Express Train Set consists of a streamlined "Pacific" with an 8-wheeled corridor Tender and a Two-Coach Articulated Unit of the type widely adopted on the L.N.E.R. The engine modelled is "Sir Nigel Gresley," named after its famous designer. The Locomotive and Tender are finished in the striking shade of blue that has been adopted as standard for the real engines of this class.

The Articulated Coaches make up a two-coach unit or "twin," with a corridor connection.

The Coaches can be separated by a locking handle underneath. The finish represents the varnished teak familiar to

all L.N.E.R. travellers. Automatic couplings are fitted.

EDG7 HORNBY-DUBLO ELECTRIC AND DG7 CLOCKWORK TANK GOODS TRAIN SETS

The Train Sets on this page are made up of typical items found on goods trains. The powerful Tank Locomotive is a particularly attractive model representing a type that is extensively used by the four main line companies for local goods and mixed traffic, and also for shunting. On account of its great adaptability the type is used extensively also for local passenger work. It is available in the style and finish of each company.

The Open Wagon represents the 12-ton vehicle adopted as a standard for the conveyance of general goods by each of the companies. The 12-ton Van is a true-to-type model of the actual vans used for general traffic requiring protection from the weather. The Brake Vans are all different in design and

detail, each following the latest practice of its company. Automatic couplings are fitted.

CITY STATION COTFIT DE

This Outfit has been specially designed for building either of two splendid city stations.

The Terminal Station illustrated on the left is an imposing model in the modern style, with three platforms covered by an arched roof span in celluloid. The front of the station, with its steps, awning and clock tower, is particularly realistic.

The Through Station shown on the right is an equally effective model, built up from the same components and ideal for through running on a large layout. Price 25/-

MAIN LINE STATION DI

TUNNEL D1 (Short)

This Tunnel is 5½ ins long and is suitable for either curved or straight track Price 1/3

TUNNEL D2 (Long)

This Tunnel is 11½ins. long. It cannot be used on curved track.

HORNBY-DUBLO ENGINE SHED DI

An attractive Two-road Building, modern in style. The Shed will accommodate two Hornby-Dublo Express Locomotives and their Tenders ... Price 10/6

a second

A realistic depot for goods traffic. Size: Length 12in., width $3\frac{\pi}{16}$ in., height $2\frac{\pi}{4}$ in. Price 4/-

FOOTBRIDGE DI

Attractive model of an up-to-date reinforced concrete Footbridge. It spans a double track, and is complete with stairways and intermediate landings.

Price 3/6

A particularly fine model in wood of a modern-style station. It is long enough to accommodate a three-coach train, and is supplied with printed gummed slips giving a choice of four names—"Berwick" (L.N.E.R.), "Penrith" (L.M.S.), "Truro" (G.W.R.) and "Ashford" (S.R.). Size: Length 24in., width 4½in., height 3½in.

ISLAND PLATFORM DI

This platform can be used separately between two tracks, or in conjunction with the Main Line Station, which it resembles in design and construction.

Size: Length 24in., width 21in., height 21in.

Price 4/-

SIGNAL CABIN DI

A typical example in wood of a medium-sized Signal Cabin, Supplied with four gummed slips printed with the names "Berwick." "Penrith," "Truro" and " Ashford." Price IId.

BUFFER STOP DI

A realistic mode! of a type to be seen in the sidings in most goods yards. With working spring heads. Price 9d.

Isolating Rails form an important introduction into the Hornby-Dublo System this year. The purpose of these is to divide a layout into separate sections that can be electrified or cut out as required by means of the special Switches (D2). This adds very greatly to the fun. Two or more trains can be controlled independently at the same time, and all kinds of interesting shunting operations can be carried out, every movement being made as on real railways,

ISOLATING RAIL

Consists of a short piece of track of the same length as the Straight Quarter Rail. Its centre rail is divided into two separate sections, each connected to the terminals provided for wiring up to Switch D2.

SWITCH D2 (for Isolating Rail)

Switch D2

IBR Isolating Rails ...

Is connected to the terminals of the Isolating Rail. Several Switches can be joined together in groups by means of Switch Grouping Rods.

Switch D2 (for Isolating ... each 1/8

Great news for Hornby enthusiasts!

PART-EXCHANGE YOUR OLD LOCOMOTIVES

KEEP YOUR RAILWAY UP TO DATE

Every owner of a Hornby Gauge O or Hornby-Dublo Railway is naturally anxious to have his Trains haulad by the latest and best locomotives available. In order to help in making this possible we now introduce a scheme in which an allowance is made on an old Locomotive when a new one is purchased. The scheme will help also those who wish to change over from Hornby Gauge O to Hornby-Dublo Gauge OO.

The age or condition of the old Locomotive does not matter; but the following conditions are made:-

(1) Only one old Locomotive can be accepted in part-exchange for each new Hornby Locomotive, or Hornby-Dublo Locomotive and Controller.
(2) The price of the new Locomotive chosen must be at least equal to the original list price of the old one returned.

IMPORTANT NOTE: This special offer is for Hornby and Hornby-Dublo Locomotives only. It does not apply to Tenders, Track, Rolling Stock, or Accessories of any kind. No allowance can be made for locomotives of other manufacture.

HOW TO SECURE THE ALLOWANCE

First of all you purchase a copy of the "Meccano Magazine," which may be obtained from your local Meccano dealer, or ordered through your newsagent. You then detach the coupon that is included in the Magazine, and complete it by filling in your name and full address, the type of Locomotive you are returning, and the one you wish to buy in exchange. You then hand the coupon and the old Locomotive to your Meccano dealer, who will complete the exchange for you and send on the locomotive together with the certificate that forms part of the coupon to us so that we may register your name and keep you posted with all Hornby and Hornby-Dublo developments.

If you prefer you may make the exchange direct, sending the coupon and the old Locomotive to Meccano Ltd., Department E, Binns Road, Liverpool,

13. Enclose the cost of the new Locomotive, less the allowance due on the old one, and include 1/- for packing and carriage.

HORNBY Gauge O TRAINS

ELECTRIC AND CLOCKWORK

The famous Hornby Gauge O Railway system includes everything that is required to reproduce in miniature almost all the operations that are carried out every day by the real railways.

HORNBY ELECTRIC TRAINS

Hornby Electric Trains can be run from the house lighting supply, where this is Alternating Current, through a Meccano Transformer that reduces the high voltage of the mains to a safe low voltage. There is no risk of shock. All Meccano Transformers are thoroughly tested and are ABSOLUTELY SAFE.

Direct Current mains supply MUST NOT BE USED to run Hornby Gauge O Electric Locomo-

tives on account of the danger of shock.

Where Alternating Current mains supply is not available, accumulators must be used. A Hornby 6-volt Locomotive requires a current of not less than 2 amps. from a 6-volt accumulator; a 20-volt Locomotive requires a current of 1 amp. at 14 volts from accumulators.

THE FAMOUS HORNBY REMOTE CONTROL

The larger Hornby 20-volt Electric Locomotives can be CONTROLLED COMPLETELY FROM THE LINESIDE. Starting, stopping, reversing and speed regulation are all effected by means of a single lever, without any necessity for handling the train.

HORNBY CLOCKWORK TRAINS

Hornby Clockwork Locomotives run long distances on one winding and have astonishing hauling powers. All of them can be braked either from the cab or from the track, and all but the smallest types are fitted with reversing mechanism.

The components of the above Train Sets are obtainable separately at the following prices:-

HORNBY MODELS OF TWO FAMOUS LOCOMOTIVES

HORNBY "SCHOOLS" CLASS LOCOMOTIVE "ETON"

This is a fine scale model of the first member of the famous "Schools" class, perhaps the most popular series of locomotives ever produced by the Southern Railway Company. All who are interested in scale-model locomotives, and especially "Southern" enthusiasts, will welcome the "ETON" both for its beauty and its fine performance.

E420 20-volt Electric Automatic Reversing Locomotive.
No. 4C Clockwork Locomotive. Price 35/-

Price 42/-

Tender, Price 6/6

HORNBY 4-6-2 LOCOMOTIVE "PRINCESS ELIZABETH"

This is a magnificent scale model of the L.M.S. "Princess Elizabeth" locomotive. It includes all the main features of the actual engine and its finish is of the highest quality. The Hornby 20-volt automatic reversing motor that is fitted ensures abundant power. "Princess Elizabeth" will run on the standard Hornby 2ft. radius track, but to run this fine engine at its highest speed and to show the immense loads it will pull Hornby Solid Steel Track is recommended.

Price, complete with Tender, in special presentation box, £5 5 0

The prices of Hornby Rails are given on pages 51/52 (tinplate) and 53 (solid steel). For particulars and prices of Transformers see page 15

HORNBY COMPLETE MODEL RAILWAYS

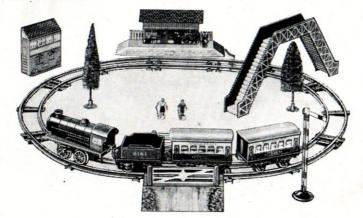

These fine Model Railway Sets provide the simplest way of beginning the fascinating Hornby Railway hobby. Unpack the box, then lay out the rails and accessories as shown in the illustration provided, put the locomotive and coaches or wagons on the track, and begin to run your own railway! It's the

greatest fun in the world!

M8 COMPLETE MODEL RAILWAY

Consists of a fine non-reversing Locomotive that can be braked from the track, Tender, two Goods Wagons and Set of Rails; Wayside Station, Footbridge, a Signal and Signal Cabin, two Trees with Stands, and Tunnel. Packed in a strong carton as illustrated.

M9 COMPLETE MODEL RAILWAY

M9

This Set includes a non-reversing Locomotive that can be braked from the track, Tender, two Passenger Coaches and Set of Rails; Station, Footbridge, Signal and Signal Cabin, Level Crossing, Guard, Porter, two Trees with Stands and two Hikers. Packed in a strong carton as illustrated.

Price 12/6

This illustration shows a suitable arrangement of the M9 Complete Model Railway.

HORNBY COMPLETE MODEL RAILWAYS

HOW TO GET MORE FUN

While each of the Hornby M8, M9, M10 and M11 Train Sets is a complete model railway in itself, greater fun can be obtained by the addition of extra rails and other items from the Hornby range. Full details of the complete range of Hornby Trains, Rolling Stock, Accessories and Rails are given in this catalogue.

M10 COMPLETE MODEL RAILWAY

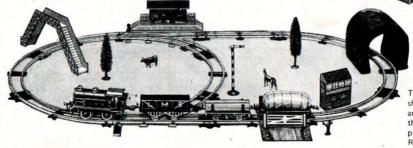

A larger Set containing a non-reversing Locomotive that can be braked from the track, Tender, two Pullman Coaches and Set of Rails; Footbridge, two Stations, Signal Cabin and two Signals, two Telegraph Poles, Loading Gauge, Tunnel, Cutting, Level Crossing, three Trees with Stands, two Porters, two Hikers, Horse and Cow. The Set is packed in an attractive special cabinet as illustrated.

M11 COMPLETE MODEL RAILWAY

This is the largest and best of the Complete Model Railway Sets. It includes a powerful reversing Tank Locomotive that can be braked from the track, Fibre Wagon, Timber Wagon, Open Wagon, and Set of Rails and Points; Tunnel, Station, Signal and Signal Cabin, Level Crossing, Footbridge, two Trees with Stands, Guard, one Cow and one Horse. The Set is packed in a strong special cabinet as illustrated. Price 27/6

This illustration shows a suitable arrangement of the M11 Complete Model Railway

GRAPHITE GREASE

An ideal lubricant for the springs of Hornby Locomotives and Hornby Speed Boats, Meccano and Aero Clockwork Motors, Meccano Motor Cars. and for filling axle-boxes. Price, per tube, 6d.

MECCANO LUBRICATING OIL

This is the best oil obtainable for Hornby Trains, Rolling Stock, Meccano Models, and Clockwork and Electric Motors.

Price per bottle. 6d.

Read the "Meccano Magazine", Price 6d. from your dealer.

ACCESSORIES FITTED FOR ELECTRIC LIGHTING

The Hornby Accessories fitted for Electric Lighting make possible the highest degree of realism. By means of them Stations, Engine Sheds, Signal Cabins and Goods Platforms can be lighted up, and goods yards and sidings illuminated by Lamp Standards. The various Signals can be made to show their red and green or yellow and green lights, and red lamps fitted to Buffer Stops and Level Crossing gates will show their warning as in actual practice. No Hornby railway is complete without some of these

The following is a complete list of the Hornby Accessories that are available fitted for Electric Lighting. They are specially designed for lighting from the 3\frac{1}{2}-volt circuit of a Meccano T20A or T6A Transformer, and with each of these Transformers are packed for the purpose a pair of Plugs, a Bonding Clip and a coil of Wire, together with full instructions. For use with clockwork railways the Accessories can be lighted from an accumulator, or if necessary from dry batteries. Each Accessory is accompanied by a Bonding Clip and a leaflet giving full instructions for use. Lamp bulbs are not provided with the Accessories.

HORNBY SOLID STEEL TRACK

Gauge O, 14in.

Although our standard timplate rails are the acknowledged best of their class, we have felt that in order to do justice to the speed and hauling power of our locomotives, especially "PRINCESS ELIZABETH" and E420 "ETON," a drawn steel rail was essential. Our object was to produce the perfect miniature railway track, and we have achieved our aim in the Hornby Solid Steel Track. The rails and points of this system are of the very highest quality, yet are sold at reasonable prices. We are confident that they will give satisfaction, not only to Hornby Train users, but to all model railway enthusiasts. The track is joined up by means of fishplates which are supplied with each rail.

STRAIGHT RAILS

ELECTRIC

EB3	Straight	Rails. (Ler	ngth 2	3in.)			each	2/8	
EB3}	Straight	Half Rails						1/7	
EB31	Straight	Quarter Ra	ails					1/-

CURVED RAILS

ELECTRIC

EA3	Curved	Rails	(10 to	circle)		 each	2/8
EA3	Curved	Half	Rails		 	 	1/7

Many owners of Hornby Railways with tinplate rails will want to add solid steel track to their layouts. To enable them to do this special adapting pieces are available.

A.P. Adapting Pieces, per box of six

OUALITY FEATURES OF ELECTRIC SOLID STEEL TRACK

- RAILS. Solid drawn steel section, zinc coated to prevent rust and to ensure good electrical contact. The overall diameter of a circle made up of 10 Curved cails is 77in
- 2. SLEEPERS. Pressed steel, of similar design to the steel sleepers used on actual railways. Each sleeper is pierced so that the track can be screwed down to a wood base.
- POINTS. On solid base, providing the greatest possible rigidity. Lever movement simple and positive. Right-hand and Left-hand points available

For Prices of Tinplate Rails see pages 51 and 52

ELECTRIC POINTS (Hand Operated)

	Right-hand Points	 	each	8/3
EPL3	Left-hand Points	 	.,	8/3

"DOLLY VARDEN" DOLL'S HOUSE FOR DINKY TOYS FURNITURE

This beautifully-designed Doll's House provides a perfect setting for the Dinky Toys Doll's House Furniture illustrated and described on this page.

The exterior of the house is designed to represent a half-timbered dwelling, while the interior decorations, which are printed in nine colours, are in an attractive modern style.

Reinforced leather board is the material of which the house is constructed, and although it is collapsible it is as strong as a wood structure when set up. The container opens out to show a lovely garden, with tennis lawn, carriage drive

and rockery.
Price of "Dolly Varden" Doll's House

The Couch Hammock, Tennis Net, Garden Seats, Dinky Toys Garage, Motor Cars and Figures, and the Hornby Trees and Hedging featured in the illus-tration are not included with the Doll's House and Garden.

AEROPLANE OUTFITS

The Aeroplane Constructor Outfits described on this page and the following pages contain assortments of component parts by means of which boys can design and build their own aeroplanes. A large number of different models can be constructed simply by varying the positions of the

parts, which are all interchangeable on the famous Meccano principle. The parts in the Nos. 1 and 2 and the No. 1 Special and No. 2 Special Outfits can be used in conjunction with the standard Meccano parts.

No. OO AEROPLANE OUTFIT

This excellent Outfit contains a good selection of Aeroplane Parts, with which delightful models of realistic appearance can be built. It is an ideal present for young boys who are keen on aeroplanes. Available in two colour schemes—red and cream, and blue and white. Price 3/-

NOTE.—The parts in the No. OO Outfit are not suitable for use with those in the other Outfits in the series.

Model of a Biplane built with No O Outfit

Model of a High Wing Monoplane built with No. O Cutfit

SPECIAL NOTE

Military identification Markings are not now included in the No. O, No. 1 and No. 2 Aeroplane Constructor Outfits. Instead the large Mainplanes and the Fuselage carry civil registration letters. The Military Rudder is replaced by a Civil Rudder.

The Special Aeroplane Constructor Outfits No. 1 and No. 2 now have Commercial Mainplanes with civil registration letters, in addition to the plain Mainplanes and Military Identification Markings.

No. O AEROPLANE OUTFIT

The parts contained in this Outfit make possible an interesting range of aeroplane models, including high and low wing monoplanes, seaplanes and standard light biplanes. The Outfit is supplied in two different colour combinations—red and cream, and blue and white Price 4/-

NOTE.—The parts in the No. O Outfit are not suitable for use with those in the other Outfits in the series.

AEROPLANE OUTFITS

Model of Standard Light Biplane built with No. 1 Outfit

Model of a Triple-engined Air Liner built with No. 2 Aeroplane Outfit

Magnificent models of high and low wing monoplanes and interesting model biplanes representing standard types can be built with this Outfit. The biplanes include models based on the popular single-seater and two-seater types of light aeroplanes. The Outfit is supplied in two different colour combinations—red and cream, and blue and white.

Price 7/5

Aeroplane Constructor Accessory Outfit No. 1a, costing 6/3, will convert a No. 1 Outfit into a No. 2

AERO CLOCKWORK MOTORS

No. 1 AERO CLOCKWORK MOTOR

This Motor is designed to fit into the fuselage of models made with No. 1, No. 2, No. 1 Special or No. 2 Special Aeroplane Outflts. It will rotate the propeller at high speed. Price I/II

No. 1 Aero Clockwork Motor No. 2 AERO CLOCKWORK MOTOR

In addition to rotating the propeller, this Motor also drives the landing wheels of No. 1, No. 2, No. 1 Special or No. 2 Special Aeroplane Outfit models. An Adjustable Tail Wheel is supplied with the Motor. Price 3/9

A much wider range of models can be built with the parts contained in this Outfit, including many twin-ind triple-engined monoplanes and biplanes, and some interesting examples of civil type seaplanes. A particularly attractive model is that of a giant flying boat, and there are also models of amphibians. The Manual of Instructions included in the No. 2 Outfit gives full details of how to build these wonderful models.

Price 12/6

All Aeroplane Outfits are available in two different colour combinations—red and cream, or blue and white.

See Special Note in reference to Identification Markings on previous page.

NOTE:-No. 1 and No. 2 Aeroplane Outfit Parts can be purchased separately from any Meccano dealer

SPECIAL AEROPLANE OUTFITS

The Special Aeroplane Constructor Outfits have been designed with great care and thought to make possible the building of more realistic models of the latest types of aircraft. Each Outfit is available in two different colour combinations.

A specially prepared Manual of Instructions is included with each of the Special Aeroplane Outfits. In addition to photographs of 44 model aeroplanes and their prototypes, this contains a section devoted to flying a real aeroplane, and explains how all the most difficult "stunts" are done.

No. 1 SPECIAL AEROPLANE OUTFIT

The parts in this super Aeroplane Outfit will build over 20 realistic models of different types of aircraft. The range of special parts includes mainplanes fitted with ailerons, tail planes with elevators, movable rudder, radial engine cowling, etc.

The Outfit is available in two different colour combinations—red and cream, and blue and white.

Price 13/6

A No. 1a Special Aeroplane Accessory Outfit, Price 10/6 will convert a No. 1 Special Aeroplane Constructor Outfit into a No. 2 Special.

No. 1 Special and No. 2 Special Aeroplane Outfit parts can be purchased separately from any Meccano dealer.

Model of a Light Biplane built with No. 1 Special Aeroplane Outfit.

Model of a Commercial Flying Boat built with No. 2 Special Aeroplane Outfit.

Model of a Triple-Engined Low Wing Monoplane built with No. 2 Special Aeroplane Outfit.

See Special Note on page 67 in reference to Identification Markings.

No. 2 SPECIAL AEROPLANE OUTFIT

This is the finest and most attractive Aeroplane Constructor Outfit on the market. It contains a big range of aircraft parts, with which splendid models of practically any type of machine can be built—44 examples are shown in the Manual of Instructions. Like the No. 1 Special Outfit, the No. 2 is available in two different colour schemes—red and cream, and blue and white.

Price 22/6

Run your models with an Aero Motor. Details are given on the opposite page.

No. 2 OUTFIT MODELS

Any type that can be built with No. 2 Outfit.

Price 18/9

Every model-building enthusiast will be keen to have one of these fine Motor Car Constructor Outfits, which build sports four-seaters, coupés, speed cars, and other perfect miniature reproductions of many different types of cars.

The motor car parts are finished in rich enamel and nickelplate.

IMPORTANT.—It should be noted that the No. 1 Motor Car. Outfit parts cannot be used in conjunction with those of the No. 2 Outfit. If extra parts for either No. 1 or No. 2 Outfit are required they can be purchased from any Meccano dealer.

MOTOR CAR LIGHTING SET

This Lighting Set contains everything necessary for equipping No. 2 Motor Car models with electric lighting, except a dry battery. This should be of the 3-volt type, size $1\frac{1}{2}$ " $\times 2\frac{1}{2}$ " $\times \frac{3}{4}$ ", and can be obtained from any dealer in electrical supplies.

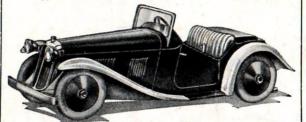

Price 2/9

TWO-SEATER SPORTS CAR (Non-Constructional)

This realistic model of a two-seater sports car is beautifully made and finished. It is fitted with a strong clockwork motor that gives a long and steady run on each winding.

It is supplied in two different colour schemes.

Price 4/11

Overall dimensions: Length 84in. Width 34in. Depth 27in.

No. 2 MOTOR CAR OUTFIT

Larger models of a superior type can be built with No. 2 Motor Car Outfit, which is available in two different colour schemes.

A powerful Clockwork Motor giving a run of 150 ft, on one winding is included in the Outfit.

Price 18/9

MOTOR CAR GARAGE

This Motor Car Garage provides accommodation for any Meccano model Motor Car or other car of suitable size. Price 5/6

DINKY BUILDER OUTFITS

No. O DINKY BUILDER OUTFIT

This is the first Outfit in the series. It contains a good assortment of Dinky Builder parts (including two road wheels), with which a splendid range of models can be built. The Instruction Folder included gives examples of 40 models, but many others of an original character may be constructed by the inventive boy or girl.

No. 1 DINKY BUILDER OUTFIT

This splendid Outfit contains a varied selection of parts, including two trees on die-cast stands that lend the correct atmosphere to models of farm buildings, churches, etc. A further attraction is a set of four road wheels for constructing miniature wheel toys, many examples of which are illustrated in the Instruction Manual that is included. This Manual shows a total of 56 fine models.

Simplicity is the keynote of this popular building system. With Dinky Builder parts the youngest children can build all kinds of models with the greatest of ease—Towers, Bridges, Coaches, Houses, Wheel Toys, Windmills and scores of others.

Dinky Builder plates are hinged on all sides, with intervening spaces so that when two are placed side by side the hinged part of one plate fits into the corresponding space in the other. The two plates are then locked together by inserting a rod. Nuts and bolts are not required.

The parts are beautifully enamelled in striking colours, giving a charm and distinction to the models that is outstandingly attractive.

DINKY BUILDER "A"

The Dinky Builder "A" packet contains a useful assortment of Dinky Builder Parts. Boys and girls should supplement the equipment they at present possess by purchasing one or more of these packets and thus greatly increase the scope of their Outfits.

THE WORLD'S BEST MAGAZINE FOR BOYS

"MECCANO MAGAZINE"

The "Meccano Magazine" is the ideal paper for all boys who take a keen interest in the world around them. Month by month its pages are filled with attractively written articles splendidly illustrated from actual photographs.

All kinds of interesting subjects are dealt with, including Railways, Aeroplanes, Motor

Cars, Ships, Wonderful Machinery, Inventions and Discoveries.

Special sections are devoted to Meccano, with Model-building Competitions for Outfits of all sizes. There are also Competitions for owners of Hornby Trains, and fascinating articles showing how to get the best possible fun from a miniature railway.

Stamp Collecting forms an important feature, and there are practical articles on Photo-

graphy, and reviews of new Pooks of interest to boys.

The "Meccano Magazine" is on sale at all bookstalls, newsagents or Meccano dealers on the first of each month, price 6d. If you prefer to have each issue sent direct, the subscription rates are 8/- for twelve months, or 4/- for six months, including postage.

PUBLISHED MONTHLY PRICE 6d.
