## REAL ENGINEERING IN MINIATURE

Meccano is a system of interchangeable parts—strips, plates, wheels, pulleys, gears, nuts and bolts, etc., with which any boy can build hundreds of magnificent models that work just like the "real thing."

There is no need to pretend or make-believe, for Meccano is real engineering in miniature.

Every Outfit includes a good selection of Meccano Parts, with a Screwdriver, a Spanner and a Book of Instructions showing many examples of models that can be built.
