# MECCANO

## TOYS OF QUALITY

### MECCANO

#### ENGINEERING FOR BOYS

Girders for a gantry, gears for a tractor, plates, pulleys, cranks, couplings, nuts and bolts . . . all the basic parts used in real engineering are in Meccano! With them boys can build scores of wonderful working models, using the same parts over and over again. Accessory Outfits and extra parts soon make small Outfits into big ones. Meccano is the hobby with limitless possibilities and fun.

	Head Lamp for Locomotive	-/2
	Tail Lamp for Locomotive or Goods Brake Van	-/2
	Side Lamp for Goods Brake Van	-/2
	Milk Can	-/3

1ft. radius Curves, Points and Crossings cannot be used in the same layout with those of 2ft. radius

# HORNBY-DUBLO ELECTRIC TRAINS

## OO' GAUGE

Hornby-Dublo electric trains operate on direct current at 12 volts. This current can be obtained in one of three ways (1), from alternating current mains supply through a suitable self-contained power unit, (2), from three 4½v. dry bell batteries (Ever-Ready 126 or Drydex H.30) or (3), from a 12-volt 20 ampere hour Accumulator. The first way is strongly recommended. When source 2 is used for power supply, a Hornby-Dublo Battery Control Unit is necessary to control each locomotive. When an Accumulator is used as a supply source, a Hornby-Dublo C3 Controller should be used also, since this unit incorporates a necessary protective device.

### HORNBY-DUBLO TRAIN SETS

#### IN B.R. LIVERIES

£ s. d.
