

0-6 OUTFIT MODELS 1916 – 1921

These tables show all the Meccano models in the main manuals published by Liverpool between 1916 and 1921 and how the model numbers changed during the period and also if the model was redesigned. They also show if the model (or a similar one) came from the previous 1908-16 era manuals and also whether they were kept in the following 1922-28 era manuals.

American No.16 Book 1 manuals are as per No.16 Edition 1 except for model 325 which is like Edition 2 – There is no model 326. American 1-3 manuals for 1921-2 are like the 1921 manuals. The American 1923 4-6 manual is a cross between the American No.16 Book 1 and the 1919-21 Liverpool manuals.

Notes:-

- 1) The number in the 'Prior' column is the equivalent model number in the 1914 manual (no prefix) or the 1914/15 Book of Prize Models (indicated by a 'P' prefix) or the 14S supplementary manual (indicated by a '14S' prefix). Note that models in the Prize Models book and 14S manual are not numbered, so a '*' along with the page number on which the model appeared is put in the table below.
- 2) The number in the 'After' column is the equivalent model number in the first 1922 manual (except where otherwise noted).
- 3) (D) against a 'Prior' or 'After' model number shows that there was a relatively minor change. Often this was to use the different parts that were included in the outfits to improve the model.
- 4) (M) against a 'Prior' or 'After' model number shows that there was a major or complete redesign of the model. Often the only similarity was the name of the model.
- 5) (P) against a 'Prior' or 'After' model number shows that the model was unchanged, but the model picture was touched up or changed.
- 6) Many new models were initially published in the 14S supplementary manual in early 1916. All these models were subsequently included in the 1916 manuals. The 14S manual was published as an interim measure for use in the new 1916 outfits along with the remaining stocks of the 1914 manuals in order to use these up. See the 1908-16 era for details of these manuals.
- 7) Outfit 1-3 models that are referenced to Book 1 below are also under identical model numbers in the separate Book A (Outfit 1-3) which was published from 1918.
- 8) Most of the outfit 0 models were also outfit 1 models. The relevant column in the 0 outfit table shows the equivalent number in the 1916 Book 1 manual.
- 9) In the first (1918) edition of Book 2 a number of models had either the wrong outfit or no outfit quoted. This was corrected in the second edition in 1919.
- 10) In 1917 a 00 outfit was introduced in the USA only. All the models were from the Outfit 0 manual apart from the Cot, which used the non braced girder version from Book 1. None of the models were numbered.

Last updated 20/12/2012

This 00 outfit appears to have been unique to America

Model – Outfit 00 (USA only)	Equivalent No. in outfit 0 manual	Manual	1917-19
