

00-10 OUTFIT MODELS 1937 - 1961

These tables show all the Meccano models in the main manuals between 1937 and 1961 and how the model numbers changed during the eras and also if the model was redesigned.

In 1948, all the models which continued unchanged from 1947 had the pictures touched up to remove the cross hatching and sharp corners on plates.

(P) against a model shows that the picture(s) for the model were new although there was no change to the model itself.

(D) against a model shows that there was a minor design change – usually to use a new part which had been added to the outfit.

(D*) against a model shows that the model was modified by removing the use of the Lighting outfit parts in 1945.

(M) against a model shows that the model had a major/complete redesign.

Last updated 28/10/2011

Model – Outfit 00	1937-41	1945-47	1948-53	1955-55	1956-61
ANTI-AIRCRAFT GUN				00.14	
BUFFER STOP				00.06	00.12
CHAIR					00.02
COSTER'S BARROW				00.10	00.16
