

NOW! BETTA BILDA ENGINEER

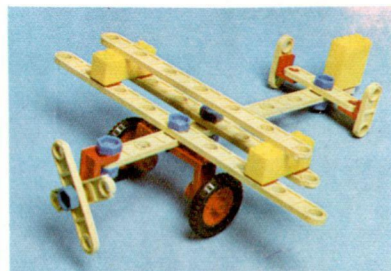

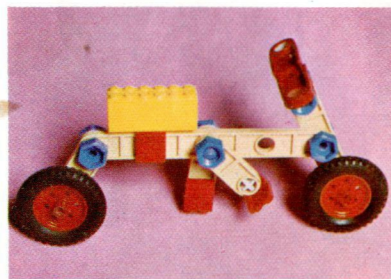

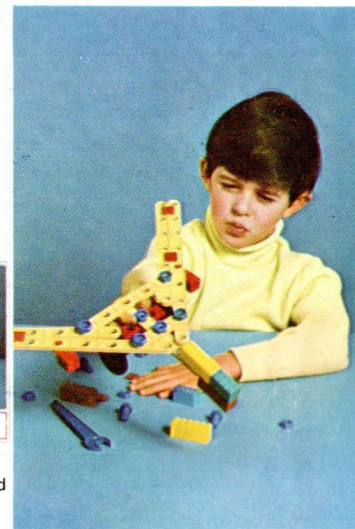

The integrated building system for all children.

BETTA BILDA ENGINEER
Betta Bilda Engineer sets include plastic nuts, bolts and wheels. They combine bricks and beams by using the adaptors shown below. This now means that realistic engineering models can be built.

E.1 SET

This first set has enough beams, nuts, bolts, wheels and bricks to build simple models as shown.

BETTA BILDA ENGINEER (CONTD.)

E.2 SET

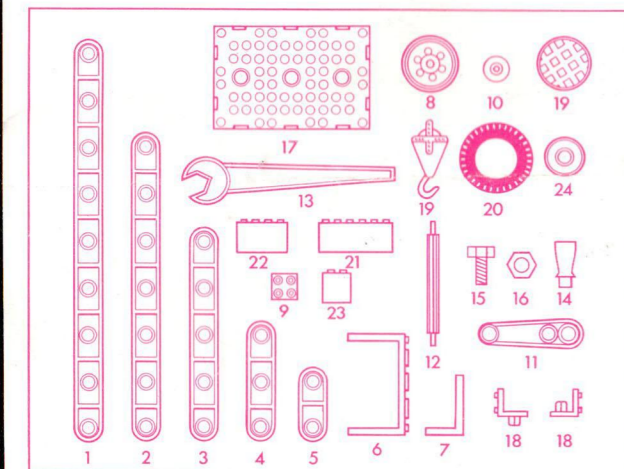

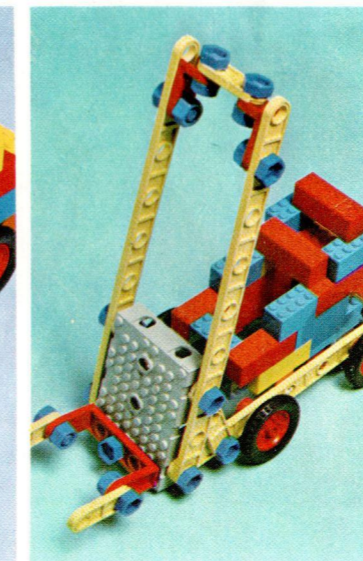

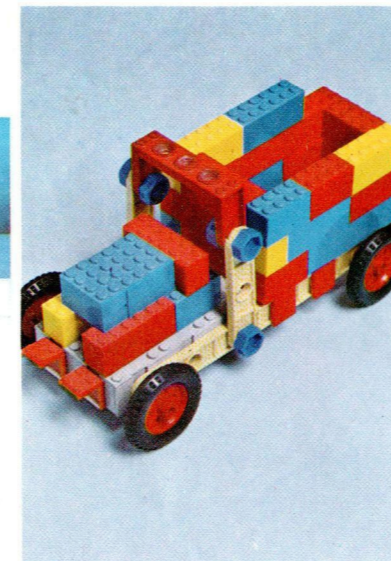

AIRFIX Betta Bilda ENGINEER SET E2

THE COMPLETE BUILDING SYSTEM

This set includes more of everything, as well as a special base useful for building vehicles, etc. Illustrations show some of the models that can be built from the E2 set.

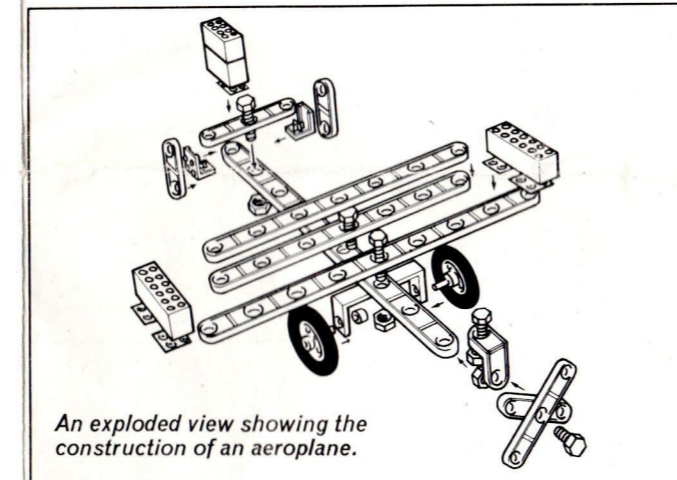

Engineer Accessory Packs will be available later.

BETTA BILDA MAKES THE MOST OF PLAYTIME

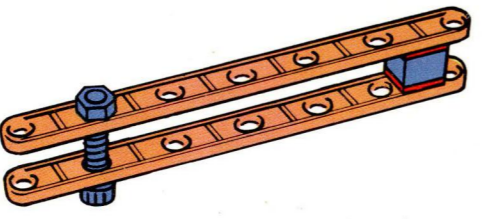

BIG BRICKS

STANDARD BRICKS

BETTA BILDA ENGINEER

All these items shown can be used separately or together.

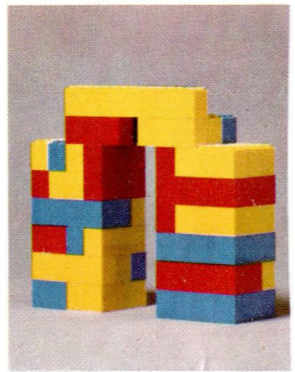

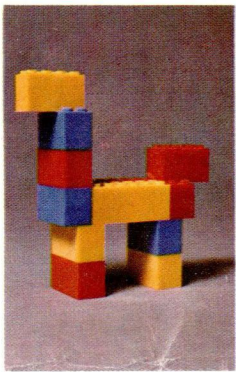

Betta Bilda —The integrated building system

BIG BRICK RANGE

BIG BRICK SET

Designed for the very young builder. Pack contains enough large and colourful bricks to keep any toddler happy for hours.

BUCKETFUL OF BRICKS

In a handy container, lots and lots of large colourful bricks to make arches, towers and animal shapes, etc.

BIG BRICK SET 'A'

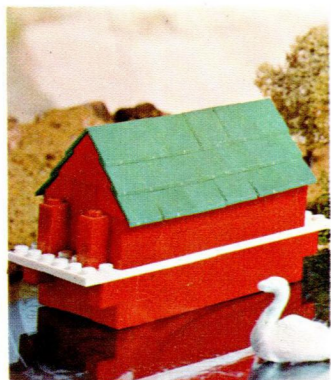

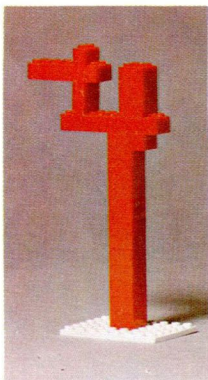

This is a new set especially designed to enable the young builder to make up a complete house. As well as large bricks there are new large tiles, windows and doors.

STANDARD RANGE STARTER SET

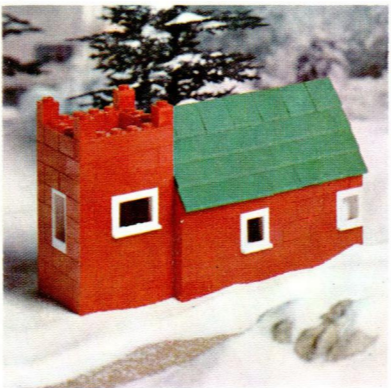

First set in the standard range—with enough bricks, tiles, doors and windows to make small buildings.

STANDARD RANGE (CONTD.) NO. 1 SET

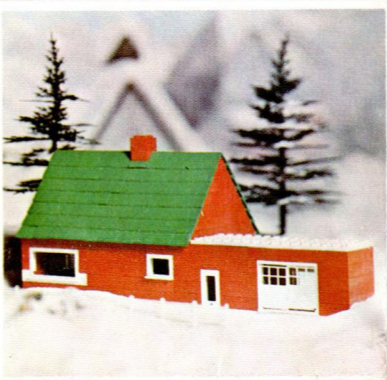

This set now includes a large base and enough standard bricks, doors, windows and tiles to build the type of models illustrated.

NO. 2 SET

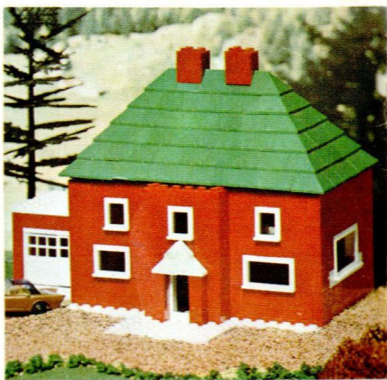

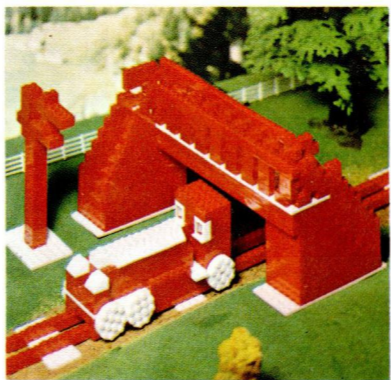

Even more parts to make bigger and better models. Now contains wheels and 20 stud beams for building lorries etc., as well as standard bricks, doors, windows and tiles.

NO. 3 SET

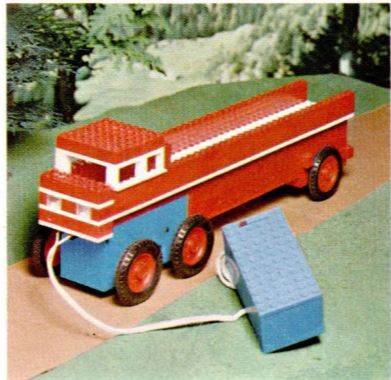

With this, the older boy or girl can construct larger models. The 20 stud beams now included in the set are especially useful for building cranes and bridges.

NO. 4 SET

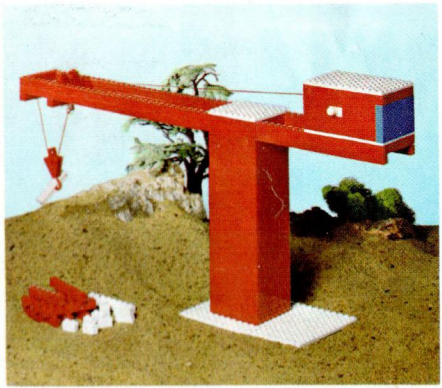

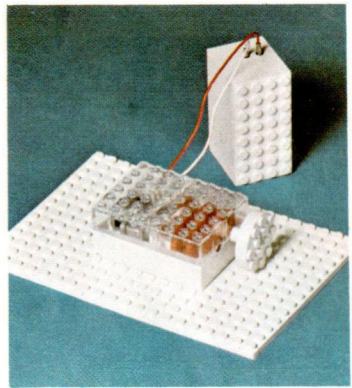

This entirely new set contains a powerful 4-wheel drive motor unit which together with the other components in the set enable exciting remote control vehicles to be constructed.

STANDARD MOTOR

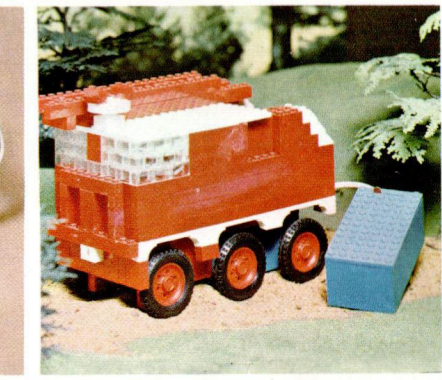

With this motor, cranes and drawbridges etc., really work!

4-WHEEL DRIVE MOTOR

To be used for remote control vehicles.
