**CHOO-CHOO CONSTRUCTION SET & TRAIN**

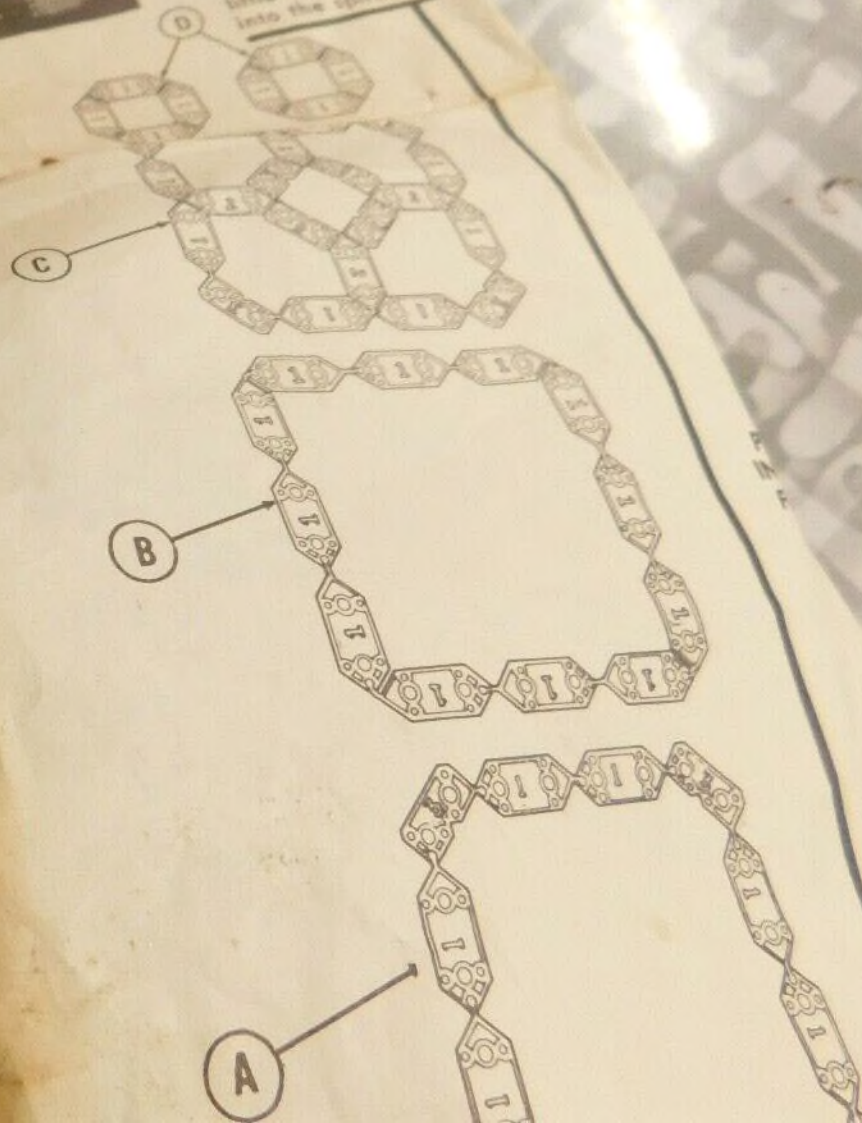

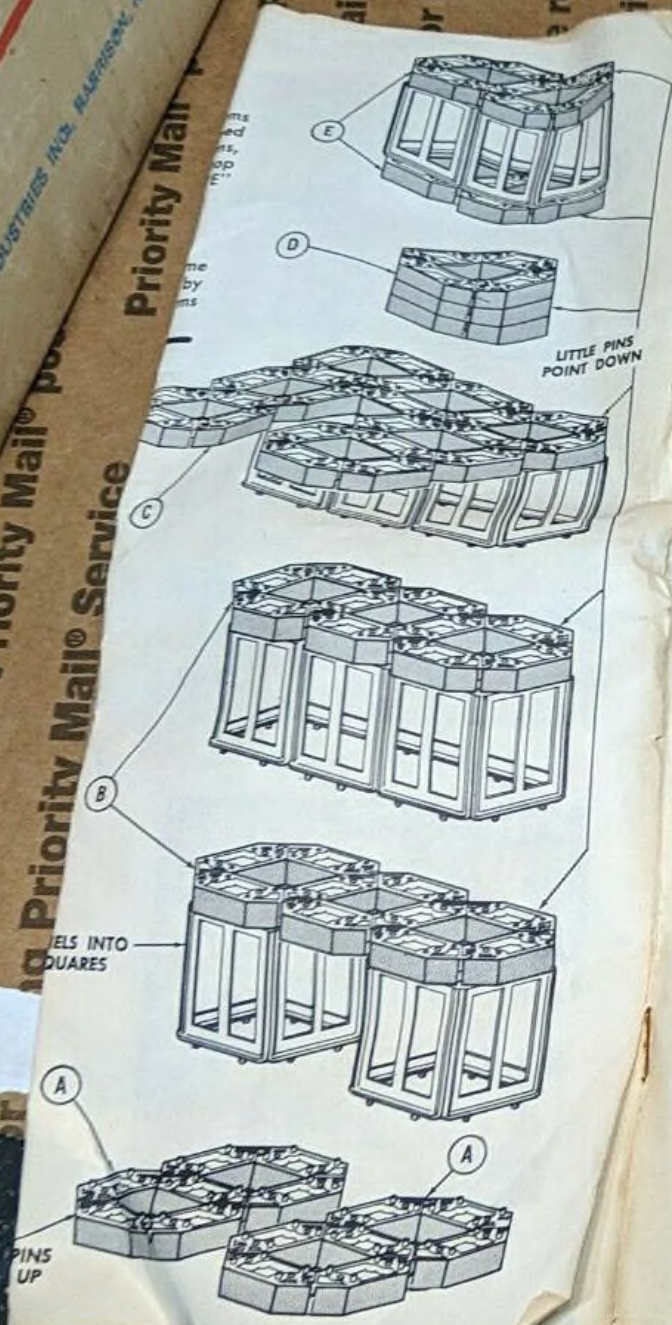

# HOW TO BUILD A SKYSCRAPER

1. First, build a base out of 60 blocks. ALL OF THE LITTLE HOLES POINT UP.
2. Build the base in stacks out of six. (SEE BELOW) FIT panels into the top.
3. Press building the tops of the walls.
4. Press panels of the walls to the end of the panels to form a square plate building.
5. Make the top building by stacking blocks at corners. Turn at the little pin little holes to the into the spire.

## THE BUILDER CONSTRUCTION SET

STEP BY STEP INSTRUCTIONS TO TEACH YOU TO BUILD EVERYTHING FROM ROBOTS TO BRIDGES TO BUILDINGS.

1. Take two blocks with #1 on them and push the tab of one into the slot in the other.

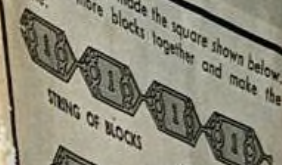

3. Now bend the string of blocks as shown below and bend the tab over so that it goes into the slot.

2. Add two more #1 blocks to the first two so that you have a string of four blocks connected together.

4. You have just made the square shown below. Joining six more blocks together and make the circle.

**IMPORTANT:** To separate blocks, just slide tab out of slot. Never pull them apart!
