

MARKLIN-ELEX

The Electrical Experiment Set,

has by far exceeded the expectations of the popularity it would achieve. We are convinced of this by the many testimonials received from young and old, especially from competent technicians and scientists of whose letters we give a few examples below.

MARKLIN-ELEX is an **experiment set complete** in itself. While working with this set one becomes familiar with the fundamental laws of magnetism and electricity. The Set contains, apart from the various parts used, a comprehensive and richly illustrated instruction manual. An ordinary pocket lamp battery is enough to be able to begin experimenting with the help of this instruction manual.

MARKLIN-ELEX

Electric Motor

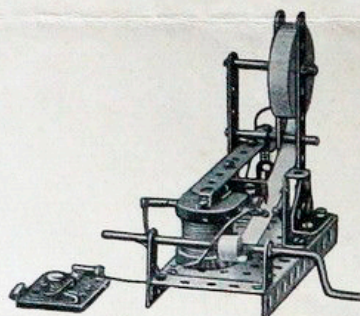

Shocking Apparatus

No. 501 - MARKLIN-ELEX — small set with instruction manual for over 60 experiments (including motor and bell)

No. 502 - MARKLIN-ELEX — large set with instruction manual for over 100 experiments

No. 501A - MARKLIN-ELEX — the supplement set for increasing the contents of No. 501 to equal those of No. 502

Morse Telegraph

Testimonials:

W. K. (Schoolmaster) writes: —

"Because of the well thought out assortment of parts and the systematic treatment of the matter in the book, from magnetism to the various types of electric motors, the set is in my opinion ideal for the teaching of the science of electricity in schools."

Professor E. Z. informs us that: —

"The problem the set sets out to solve, namely to construct a large number of apparatuses from typical parts, is very well solved. With your unlimited experience in this field this was to be expected. The experiments were all successful, this was also not to be wondered at as I am in the trade, but my 12 year old nephew, for whom we bought the set as a Christmas present, writes that he has had the same experience."

Mr. E. L. writes: —

"I would like to take this opportunity to express my appreciation of the excellent appointment and execution of your Elex sets. They are, like your railways and construction sets, perfect in every respect. It gave me special pleasure to notice that you did not allow yourselves to be persuaded by conditions to make something 'cheap' of Elex. Your quality is such that I always know that I am not spending my money uselessly."

H. R. (Schoolboy) writes us: —

"No toy has ever given me so much pleasure as this Märklin Elex Set, which is specially instructive to us boys. I have performed, without help of any kind, even the most difficult experiments, all of which were immediately successful."
