

# MARBI

## The Little MARKLIN Metal Construction Set.

**MARBI Construction Set**  
with 94 parts, including a 24 page  
book of designs and instructions  
for more than 120 Models  
No. 601

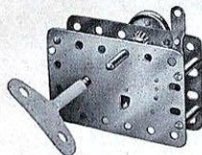

**MARBI Supplement Set**  
with 75 parts, including a 20 page  
book of designs and instructions  
for more than 100 Models  
No. 601A

**MARBI** the inexpensive construction set, unapproachable for good quality and generous contents has firmly established itself in a short time. Thanks to its low price, it is suitable for all pockets and because of the large number of models which can be built it has become very popular everywhere.

Although the little **MARBI** Sets, the parts of which are unpainted, cannot be said to be one of the range of the famous **MARKLIN** Construction Sets, the parts are nevertheless mostly identical with the **MARKLIN** parts. The sizes, holes etc. are the same, so that **MARBI** can as well be used with **MARKLIN** Metal Construction Sets.

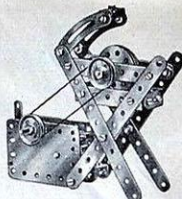

**MARBI** Metal Construction Sets can be used as sets complete in themselves. With a single box No. 601 an unlimited number of simple models may be built. By adding other boxes, proportionately larger and more complete models can be produced.

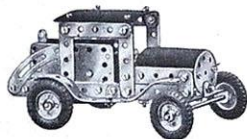

**MARBI Clockwork Motor,**  
No. 650  
in box with key and various  
accessories including full instructions.

### The little MARBI Clockwork Motor

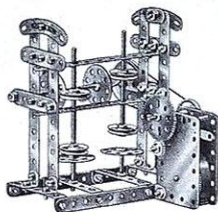

imparts life into the self-made models. The adjacent illustrations give an idea of what can be done with this low priced but powerful motor. By fitting a gear drive, greater power can be achieved at slower speeds. Small tyres which can be fitted to the car models give a most realistic appearance.
