MODEL 1/10  
Parts required:  
55 Whole bricks  
20 Half bricks  
1 2-in. lintel

## DETAILS OF MINIBRIX SETS AND PRICES

**JUNIOR SET.** This set consists of 107 component parts, all in Multi-Colour Minibrix. As its name implies, it is intended for the toddler. Among the models that can be built with this set are a dog, a diver, a baby tank, etc. See inside for illustrations.

PRICE £1.0.0

**No. 1 SET.** The No. 1 set contains a total of 147 parts and includes windows, doors and roofs in addition to bricks and linteils of all sizes. Among the many excellent models that can be built with this set are a grand-stand, a summer house, a house, cottage, pavilion and shed, etc.

PRICE £1.10.0

**No. 2 SET.** This popular set contains 195 Minibrix parts, including 3 roofs, enabling a vast range of models to be constructed, such as a signal-box for your model railway, churches, a lych gate, a small house, a goods shed, and a variety of others.

PRICE £2.2.0

**No. 3 SET.** With this set such interesting models as a pair of semi-detached houses, a bungalow, a granary, a chapel, a railway halt, an inn, can easily be built. Contains 270 assorted Minibrix parts.

PRICE £3.0.0

**No. 4 SET.** The lucky owner of a No. 4 Minibrix set receives no less than 432 parts, including balustrades and universal pins. With these he can construct a great number of large and elaborate models, including a fine inn, a modern bungalow, a residence with portico, a villa, a mission hall, a village church, a splendid viaduct, etc.

PRICE £4.4.0

**No. 5 SET.** With this set Corinthian pillars and double angle bricks are included among the 641 parts, enabling the owner to build many more complicated and interesting models not possible with the smaller sets. Among these are a power station, a central school, a lighthouse and a magnificent railway terminus, etc.

PRICE £6.0.0

**No. 6 SET.** This is a set for an ambitious young builder. It contains 895 parts, including a large supply of Corinthian pillars, balustrades and other useful accessories with which to build such models as a large factory, a fine country residence, a sports pavilion, library, etc.

PRICE £8.8.0

**No. 7 SET.** Another set for the boy who wants to build—really "super"—models. This set contains no less than 1,375 Minibrix parts enabling such models as a huge skyscraper, modern flat buildings, etc., to be built. The possessor of this set can, in addition, build an endless variety of large, elaborate models of all kinds.

PRICE £12.12.0

PREMO RUBBER CO. LTD. PATENTEES AND MANUFACTURERS PETERSFIELD HANTS ENGLAND

**IMPERIAL COMBINATION CABINET.** This consists of all the parts contained in a No. 6 Minibrix and a No. 2 Tudor Minibrix set, together with a 14 in. x 21 in. base plate. Housed in a magnificent polished cabinet.

PRICE £21.0.0

**DE LUXE COMBINATION CABINET.** This is a most magnificent outfit—the dream of all Minibrixers. It is definitely the last word in constructional sets, and is a combination of a No. 7 Minibrix and a No. 3 Tudor Minibrix set. It possesses a 14 in. x 21 in. base plate, and, like the Imperial Cabinet—only in a much bigger way—it enables one to construct all the Elizabethan as well as modern buildings.

PRICE £30.0.0

**MINIBRIX ACCESSORY SETS.** With an Accessory Set you can convert your present set to a larger one, and so construct many larger models.

Accessory set "X" added to No. 1 Minibrix equals a No. 3 set.  
Accessory set "A" added to No. 3 Minibrix equals a No. 4 set.  
Accessory set "B" added to No. 4 Minibrix equals a No. 5 set.  
Accessory set "C" added to No. 5 Minibrix equals a No. 6 set.  
Accessory set "D" added to No. 6 Minibrix equals a No. 7 set.

Prices of Minibrix Accessory Sets:			
Set "X" ...	£1.10.4	Set "C" ...	£2.14.0
Set "A" ...	£1.6.0	Set "D" ...	£4.10.0
Set "B" ...	£2.0.0		

**Tudor SET 1.** Contains 450 assorted parts, sufficient to build a vast range of interesting Tudor houses.

PRICE £4.4.0

**Tudor SET 2.** This set has a total of 911 assorted parts. With it many striking models may be built as well as countless other Tudor dwellings, etc., from the builder's own ideas.

PRICE £8.8.0

**Tudor SET 3.** With this set are included 1,378 parts enabling realistic models to be built of such famous buildings as Anne Hathaway's Cottage, the God-Begot Inn at Winchester, the Old Moot Hall at Aldeburgh, Suffolk, etc. This large assortment of parts also gives endless scope for modelling other historic Tudor buildings, etc.

PRICE £12.12.0

# How to Build with MINIBRIX

A complete building system in miniature with all-rubber, self-locking bricks.

## REAL BUILDING IN MINIATURE

When you build with Minibrix, you are working on similar lines to real builders. Minibrix is architecturally correct. The models and diagrams have been drawn up under the supervision of a leading architect, the late Mr. W. A. T. Carter, A.R.I.B.A. Thus, besides being a practical and fascinating pastime, Minibrix is also an instructional hobby. It teaches the rudiments of architecture, the elements of building, develops skill and inventiveness, and helps you to work out problems for yourself. The Minibrix system of building construction is based on the wonderful Minibrix miniature rubber building bricks with their simple and effective self-locking device. With these bricks, and the other miniature building materials included in each set, any number of realistic models of houses, cottages, bridges, railway stations, as well as true-to-life models of famous buildings may be built.

These rubber building materials are made to scale and are supplied in all forms required for real building—whole bricks, half bricks, angle bricks, etc., in brick-red in the standard Minibrix sets, and black and white in the Tudor sets, all of which fit firmly together by means of the patent self-locking device.

You will notice on looking at the bricks that they have studs on one side and holes on the other. By simply pressing the studs of one brick into the holes of the next, the bricks snap firmly into position, yet may easily be taken apart. Note too that the lintels, which are used mainly for foundations and for door and window sills have holes on both sides, but no studs. The tiny holes in the lintels and bricks are for fitting the doors and windows, which can be made to open and shut in the most life-like manner. Lintels may, if necessary, be locked or fastened to other building components by the use of universal pins, which become in effect "studs".

The toddler can make lovely models in pastel shades with the attractive Junior Set, while for the older child the No. 1 Set is designed for beginners in real model building. Larger sets contain such special parts as fluted Corinthian pillars, balustrades and universal pins. These are used to lock components together where the studs are not available.

With Tudor - Minibrix sets one can build models of the charming half-timbered cottages, houses, manors, etc.

## NOTE TO PARENTS

Being made of high quality rubber, the bricks cannot scratch furniture; neither will they chip or break off. Minibrix is hygienic throughout, the components are washable and almost everlasting and may be passed on from one child to another. The entire outfit is perfectly safe and may be placed with absolute confidence in the hands of the youngest child.

This picture shows how easily the all-rubber bricks fit together. The slightest pressure only is required to make the studs go into the holes, and they hold firmly and may be pulled apart without effort. This self-locking device is patented and an exclusive Minibrix feature.
