# WITH THESE NEW IMPORTANT FEATURES

"Boys of all ages" will enjoy the new, improved Trix Engineering Construction Sets. Forty-eight different models can be constructed from the blueprints included with three basic sets. All components are exceptionally strong and precision-finished and their basic design permits them to be used again for new constructions — products of stimulated imagination of the "Engineers of Tomorrow" . . . or additional Trix models contained in the new Trix "blueprint" folder.

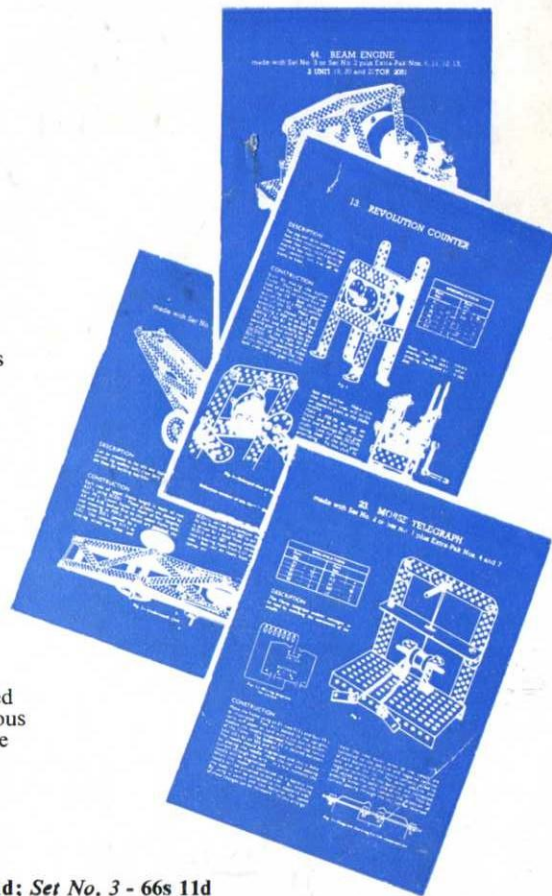

## BLUEPRINTS

Each of the three basic sets contains blueprints required for building the models specified in that set. Every detail of construction is plainly visible and easy to follow, descriptions are clear and concise and the detailed specification of components makes assembling a job that is fascinating in its simplicity and precision. Different sets of engineer's style blueprints are available from your dealer or direct from the factory.

## ENGINEERS TOOL ROLL

The components of each basic set are contained in a plastic, engineer's style tool roll with various sizes of inside pockets and a strong plastic tape on the outside for tying it when rolled. You will like the professional and functional look of this strong container, designed for easier handling and secure storing.

Prices of sets: Set No. 1 - 16s 7d; Set No. 2 - 41s 11d; Set No. 3 - 66s 11d

# WITH THE TRIX UNIT SYSTEM YOU START WITH ANY SET AND SIMPLY ADD TRIX EXTRAPAK UNITS TO BUILD BIGGER & BETTER MODELS

THIS GRAND  
MODEL OF A  
WINDMILL PUMP  
IS BUILT WITH  
SET No. 3 OR  
SET No. 2 AND  
EXTRAPAK UNITS  
6, 11; 2 Nos. 12, 13;  
2 Nos. 19, 20 AND 21.  
THE ELECTRIC  
MOTOR CAN BE  
USED FOR  
DRIVING POWER.

## The famous TRIX "PERMAG" ELECTRIC MOTOR

Some of the more intricate models can be run by electric power. The famous Trix "Permag" Electric Motor 2051 has been designed to provide motive power for belt, chain, gear or direct drive. It runs on 4-8 volt dry battery and allows for efficient operating under the conditions of complete safety.

Price 14/6

ONLY  
**2/-**  
EACH

Unlimited scope faces any boy who learns with Trix to master the first principles of engineering. Trix "Extrapak" units cost only 2/- each and contain an assortment of parts that added to any basic set produce new models from the Trix "Blueprint" folder, plus countless trial-and-error combinations of one's own. By easy stages an imposing stock of components and blueprints can be built-up to construct bigger and better models.
